

TITLE: EMS-D-010 ENVIRONMENT POLICY

PMP strives to be a sustainable business which meets our responsibilities to the environment through long-term objectives of reducing emissions, preventing pollution, minimising waste and conserving natural resources.

PMP will achieve these goals by applying the “four R’s” principle in all areas of our operations – reduce, reuse, recycle and replenish.

PMP will show leadership by educating and training our staff to drive continual improvement in our environmental performance in the workplace and the community.

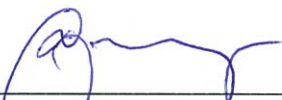

PMP will manage our operations to comply with all relevant Australian, New Zealand and International environmental legislation and reporting obligations.

PMP will partner with staff, contractors, customers and our supply chain in order to achieve our sustainability goals and positively influence the entire value chain.

PMP will measure and report our performance against meaningful benchmarks and regularly review our environmental objectives and targets.

PMP will investigate practical opportunities to minimise the waste of raw materials, energy and water together with maximising recycling.

This policy applies to all employees of PMP Limited and all contractors working on a PMP Limited site.
